1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☒ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
☐ This opinion has been established on the basis of a translation from the original language into the following language
_____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
☐ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material
☐ in written format
☐ in computer readable form
 - c. time of filing/furnishing
☐ contained in the international application as filed.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Priority

1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

D1: US 6 202 900 B1 (TSUTSUI TATSUO ET AL) 20 March 2001

- 2 Document D1, which is considered to represent the most relevant prior art, describes (the references between parentheses apply to this document):

A control valve for dispensing fluid products, designed to be mounted on a reservoir containing fluid product, the said valve comprising a valve body (12) comprising a metering chamber (21), and the valve comprising a first valve element (19) for dispensing the product contained in the metering chamber (21), and a second valve element (18) for filling the said metering chamber (21),

from which the subject matter of independent claim 1 differs in that:

the said first and second valve elements are actuated separately during valve use.

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

2.1 The subject matter of claim 1 is therefore novel
(PCT Article 33(2)).

The problem that the present invention is intended
to solve can be considered to be:

How to improve metering accuracy and
reproducibility and facilitate the filling of
the reservoir with the fluid product and with
the propellant.

2.2 The solution to this problem, as proposed in claim 1
of the present application, is considered to involve
an inventive step (PCT Article 33(3)), for the
following reasons:

By using 2 valve elements (one for admission,
one for delivery) actuatable separately for the
metering chamber, it is possible to obtain a
rest position in which the metering chamber is
closed off from the reservoir and from the
exterior (no return of the product to the
reservoir, and therefore more accurate metering)
and the reservoir can easily be filled by
opening both valve elements simultaneously.

2.3 Claims 2-11 are dependent on claim 1, and claims 12
and 13 relate to a dispensing device comprising a
valve according to one of claims 1 to 11. As such
they also meet the requirements of novelty and
inventive step of the PCT.
